## EDUCATION

### Stevens Institute of Technology

Hoboken, NJ

*Bachelor of Science in Computer Science | GPA: 3.890*

*Expected May 2026*

**Scholarships and Awards:** Edwin A. Stevens, Dean's List: Fall 2023-Spring 2025

**Relevant Coursework:** Cloud Computing, Deep Learning, Agile Methodologies, Software Development, Database Management, Web Programming, Data Structures and Algorithms

## TECHNICAL SKILLS

**Languages:** Java, TypeScript, JavaScript, Python, C, C++, SQL, Bash, HTML, CSS

**Technologies and Frameworks:** Spring Boot, Next.js, React, Angular, Express.js, Node.js, Electron.js, Redux, Pandas, Numpy, PostgreSQL, MySQL, MongoDB, Firebase, Redis, Pinecone

**Cloud & Devops:** AWS, Google Cloud Provider, Git, Docker, CI/CD (GitHub Actions)

## EXPERIENCE

### Backend Developer

July 2025 - Present

*Mentorly Learn*

*Remote*

- Engineered 15+ JWT-protected REST API endpoints using a Java Spring Boot MVC backend, and created 3 MySQL schemas, to improve the interactions between tutors and students
- Implemented secure and easily accessible homework file uploads and retrieval using Google Cloud storage bucket
- Delivered 92% coverage of endpoints and database access by implementing 50+ unit tests using JUnit and Mockito
- Collaborated in an agile team environment to ensure efficient project progress and alignment

### Course Assistant

September 2024 - Present

*Stevens Institute of Technology*

*Hoboken, NJ*

- Assisted in 2 courses of 40+ students each, covering material in programming fundamentals and data structures
- Hosted weekly office hours and recitations/labs, addressing student questions and providing additional support
- Graded home works and labs in a timely manner, giving feedback on incorrect answers and coding mistakes

### Software Engineer

May 2024 - August 2024

*Unes Meat and Chicken LLC*

*Hackettstown, NJ*

- Designed and developed an inventory management system using Electron.js and React, providing a team of 5 people with quicker and accurate livestock count and financial records
- Implemented a CI/CD pipeline (GitHub Actions) to automate the testing, building and deployment stages of the management system, cutting deployment time and reducing operational overhead
- Integrated an Excel spreadsheet with a data visualization dashboard using Recharts
- Gathered feedback from the owner during meetings to enhance product reliability and ensure user satisfaction

## PROJECTS

### Advanced Turkish Translator | *Next.js, Java, Springboot, PostgreSQL, Material-UI*

July 2025 - August 2025

- Developed an English-Turkish translator that provides both full-sentence and word-level meanings, coupled with a flashcard feature and spaced repetition algorithm to strengthen user vocabulary retention
- Integrated DeepL API and Zemberek NLP into the Java Spring Boot backend to provide accurate translations, including decomposition of Turkish words into root words and suffixes for enhanced precision
- Implemented data persistence with JPA/Hibernate ORM for reliable SQL database interactions and entity-DTO mappers for communication between the frontend and backend
- Utilized JWT-based authentication and middleware to prevent unauthorized access, and Bucket4j rate limiting to control request frequency, maintaining system integrity

### Stevens Final Exam Finder | *Typescript, React, Node.js, Express, PostgreSQL*

July 2024

- Collaborated with a team of four during a hackathon to create a web application to streamline final exam dates and times for 1000+ Steven Institute of Technology students
- Modified Excel-style exam schedules into a PostgreSQL database, optimizing data management and data retrieval
