EDUCATION

Stevens Institute of Technology

Hoboken, NJ

Bachelor of Science in Computer Science | GPA: 3.890

Expected May 2026

Scholarships and Awards: Edwin A. Stevens, Dean's List: Fall 2023-Spring 2025

Relevant Coursework: Cloud Computing, Data Mining, Deep Learning, Agile Methodologies, Software Development, Database Management, Web Programming, Data Structures and Algorithms

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, C, C++, SQL, Bash, HTML, CSS

Technologies and Frameworks: Spring Boot, Next.js, React, Angular, Express.js, Node.js, Electron.js, Redux, Recharts, Pandas, Numpy, PostgreSQL, MySQL, MongoDB, Firebase, Redis, Pinecone

Cloud & Devops: AWS, GCP, Git, Linux, Docker, Kubernetes, CI/CD

EXPERIENCE

Backend Developer

July 2025 - Present

Mentorly Learn

Remote

- Enhanced the backend of a tutor-student interaction platform by developing 15+ RESTful API endpoints with Java Spring Boot (MVC), and extending the MySQL schema with 3 tables
- Leveraged Google Cloud buckets for secure and easily accessible storage and retrieval of homework and blog files
- Delivered 92% coverage of endpoints and database access by implementing 50+ unit tests using JUnit and Mockito
- Contributed in an Agile environment, utilizing GitLab for task coordination and streamlining project delivery

Course Assistant

September 2024 - Present

Stevens Institute of Technology

Hoboken, NJ

- Assisted in 2 courses of 40+ students each, covering material in programming fundamentals and data structures
- Hosted weekly office hours and recitations/labs, addressing student questions and providing additional support
- Graded home works and labs in a timely manner, giving feedback on incorrect answers and coding mistakes

Software Engineer

May 2024 - August 2024

Unes Meat and Chicken LLC

Hackettstown, NJ

- Designed and developed an inventory management system using Electron.js and React, providing a team of 5 people with quicker and accurate livestock count and financial records
- Integrated an Excel spreadsheet with thousands of rows into a Recharts dashboard, enabling real-time insights.
- Implemented a CI/CD pipeline with GitHub Actions to automate the testing, building and deployment stages of the management system, cutting deployment time and reducing operational overhead
- Coordinated meetings with the owner to gather feedback, enhancing product quality and ensuring user satisfaction

PROJECTS

Advanced Turkish Translator | Next.js, Java, Springboot, PostgreSQL, Material-UI

July 2025 - August 2025

- Developed an English-Turkish translator that provides both full-sentence and word-level meanings, coupled with a flashcard feature and spaced repetition algorithm to strengthen user vocabulary retention
- Integrated DeepL API and Zemberek NLP into the Java Spring Boot backend to provide accurate translations, including decomposition of Turkish words into root words and suffixes for enhanced precision
- Implemented data persistence with JPA/Hibernate ORM for reliable SQL database interactions and entity-DTO mappers for communication between the frontend and backend
- Utilized JWT-based authentication and Next.js middleware to prevent unauthorized access, and Bucket4j rate limiting to control request frequency, maintaining system integrity

Rate My Professor Chatbot | Next.js, Gemini, Python, Pinecone, LangChain, Ollama Material-UI

August 2024

- Built an AI-powered chatbot to deliver professor reviews and ratings through a user-friendly, interactive interface.
- Designed a backend API powered by a RAG Pipeline that uses LangChain, Ollama, and a Pinecone vector database to generate accurate, context-aware responses to user queries.
- Integrated a Pinecone vector database with Python to store, retrieve, and index professor-related data efficiently.
